BLF dated May 30, 2013

Entrepreneurship and Training

by Sri. Devdas Pai

Managing Director, Nanocell Networks, Bangalore

In the current working scenario which is more dynamic than the past various factors like scalability, competition, technology, acquisition of know-how need to be addressed at a pace not known before. Besides the competence levels need to continuously upgrade and be adaptable to changes in business scenario. Sri Devdas Pai, Managing Director - NanoCell Networks Pvt Ltd addressed the students of MPBIM at the Business Leadership Forum held on 3rd May 2013.

He stressed on the need to train the manpower in order that the company has the technology advantage. He also outlined the need for an adequate networking, positioning and branding. He shared his experiences in South Africa. He stressed that the firms need to focus on building in-house faculty to ensure the competence levels in employees is upgraded continuously and also on e-learning. This will help the organization in sustaining and ensure growth. He laced his talk with many live examples from his experience at Motorola, Ericsson, etc.

NanoCell Networks Pvt Ltd is an organization focused on delivering telecom education solutions across the world.
