M.P. Birla Institute of Management

Business Leadership Forum Session -4 Japanese Management Techniques Sri K S Madhavan, Chairman of Shingo Institute of Japanese Management 11th May 2017

Sri K S Madhavan, Chairman of Shingo Institute of Japanese Management, in the 4th session of talks under Businbess Leadership forum spoke about evolution of Japanese techniques like TEI,TOM TPM 5S etc in the quest towards achieving global leadership. He said Japan handled triple disaster Tohoku earth

quake, deadly tsunami and Fukushima Nuclear Disaster effectively.

Japanese management techniques spread all over the administration, schools colleges and public places too. It is basically a multi-directional focus – Individual Performance and Institutional Performance with the objective that entire Society shall excel. The effort is to move from individual glory to excellence of whole society/ community. From Individualistic attitude to collective attitude

Shingo Institute of Japanese

He said 5S technique changes the individual and brings orderliness in him resulting in a clean workplace, clean thinking and removes dirty work habits. TQC was evolved in Japan to ensure that customers get the best quality both as committed by the organisation and as experienced by the customer. Customer or even the supplier may not be aware of

certain quality needs initially, but whenever they face problems IT SHOULD BE RESOLVED PERMANENTLY.

He said that JIT or Just in Time concept was evolved in japan to eliminate or minimise INVENTORY inventory is money stuck-up in materials not in use when they are lying as Inventory.

M.P. Birla Institute of Management

In conclusion, he spoke of SMED (Single Minute Exchange of Dies) concept that ensures that all elements of activities that are external to the direct operation of the machine are independently carried out well before the previous operation is completed, so that it is ready for reloading.
